

Epigraphers and Encoders: Strategies for Teaching and Learning Digital Epigraphy

This course will discuss the EpiDoc. (TEI markup for epigraphy and papyrology) training workshops for colleagues from Faculty of Humanities Koper and all those, who have an interest in the recording of archaeological sites and their preparation for scientific publication.

We shall explore some of the evolving approaches used and strategies taken in the teaching of digital encoding to an audience largely of classicists and historians.

We shall share some of the open teaching materials that have been made available, and consider pedagogical lessons learned in the light of EpiDoc practitioners who have progressed from training to running their own projects, as opposed to those who have learned EpiDoc directly from the published Guidelines or via the TEI.

We shall also compare the teaching of EpiDoc to the teaching of epigraphy to students, and find out the pedagogical approaches of both practices (which overlap, since many epigraphic modules now include a digital component, and very rarely teachers of epigraphy are treating EpiDoc as the native format for editing inscriptions).

Schedule:

University of Primorska, Faculty of Humanities, Titov trg 5 Koper-Capodistria, 28. - 30. 3. 2018.

Wednesday	12.30-14.55, lecture room Maestral 1
Thursday	09.00-14.00, lecture room Maestral 1
Friday	09.00-14.00, lecture room Maestral 3

Lecturer:

M. S. Rehan

Education:

2003 - 2007 Bachelor of Archeology and Egyptology at the Alexandria University, Egypt,

2009 - 2011 Master of Egyptology & Coptology at the Tanta University,

2015 - 2017 Master of Egyptology at the University of Munich (Ludwig-Maximilians-Universität).
